SKILLS

Languages | C++, JavaScript, C, Python, Java

Frameworks | HTML and CSS

Tools/Platforms | MySQL, MongoDB, Git, GitHub

Soft Skills | Problem-Solving, Team Player, Quick Learner, Adaptability

PROJECTS

Med-flow HMS - Hospital Management System

Jun' 26

- Developed a hospital management system to streamline patient, doctor, appointment, and hospital record management
- Implemented Queue, HashMap, Binary Search Tree, and Graph data structures for efficient data organization and retrieval
- Applied shortest-path algorithm for graph-based hospital management operations
- Designed and integrated modules for managing patients, doctors, appointments, and hospital-related information
- Implemented testing and validation to ensure reliable system functionality and accurate data handling

Deadlock Visualizer - Operating System Deadlock Detection Tool

Apr' 26

- Developed an interactive web-based tool to visualize and understand deadlock detection in operating systems
- Implemented Resource Allocation Graph concepts to represent processes and resources
- Designed an interactive interface to demonstrate resource allocation and identify possible deadlock conditions
- Provided visual representation of process-resource relationships to simplify deadlock analysis and learning

Local Vendor Marketplace | Web Development

Nov' 25

- Developed a digital marketplace platform enabling local vendors to showcase and manage their products online.
- Implemented customer-side functionality for browsing products, placing orders, and tracking purchases.
- Designed vendor-side features for managing product listings and customer orders.
- Built a centralized digital platform that simplifies product discovery, online ordering, and vendor management for local businesses.

TRAINING

Lovely Professional University

Jun'26 — Jul' 26

Fundamentals of Data Structures: Learn, Apply and Build Projects

- Completed a skill development course focused on learning and applying fundamental Data Structures concepts through programming and project-based practice.
- Applied data structures and problem-solving techniques to build and solve programming problems, strengthening algorithmic thinking and coding proficiency.
- Achieved Grade A, demonstrating strong understanding and practical application of Data Structures concepts.

CERTIFICATES

Fundamentals of Data Structure | LPU

Jul' 26

DBMS | Infosys Springboard

Jun' 26

AI foundation associate | Oracle

May' 26

OOPS | Infosys

Aug' 25

ACHIEVEMENTS

Earned A grade in LPU's summer training

Solved 100+ questions on LeetCode, strengthening Data Structures and Algorithms and Problem-solving skills.

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; CGPA: 6.3

Phagwara, Punjab

Aug' 24 — Present

KPS High School

Intermediate

Dumraon, Bihar

PCM; Percentage: 74.3%

Apr' 22 – Mar' 24

Cambridge School Dumraon

Percentage: 77.6%

Apr' 21 – Mar' 22
